Author Index

Aguilar Elguezabal, A., see Matralis, H.K. 365
Armengol, E., Corma, A., García, H. and Primo, J.
Acid zeolites as catalysts in organic reactions. Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
Asami, K., Fujita, T., Kusakabe, K., Nishiyama, Y. and Ohtsuka, Y.
Conversion of methane with carbon dioxide into C_2 hydrocarbons over metal oxides 245
Avdeeva, L.B., see Shaikhutdinov, S.K. 125
Baker, R.T. and Metcalfe, I.S.
Activity and deactivation of $La_{0.8}Ca_{0.2}CrO_3$ in dry methane using temperature-programmed techniques 297
Baker, R.T. and Metcalfe, I.S.
Activity and deactivation of $La_{0.8}Ca_{0.2}Cr_{0.9}X_{0.1}O_3$ (X = Ni, Co) in dry methane using temperature-programmed techniques 319
Bal'zhinimaev, B.S., see Goncharova, S.N. 67
Barbier, J., see Pieck, C.L. 153
Barthomeuf, D.
Compared formation of light products in n-alkane cracking in Sapo-37 and Si–Al faujasites. Energy gradient selectivity 187
Bellussi, G., see Kiricsi, I. 401
Bessell, S.
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
Bukur, D.B., Koranne, M., Lang, X., Rao, K.R.P.M. and Huffman, G.P.
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Chang, L., see Zhang, J. L205
Chang, L., see Zhang, J. L219
Cheng, S., see Jong, S.-J. 51
Cheng, Y., see Wang, F. L229
Christiansen, L.J., see Rostrup-Nielsen, J.R. 381
Corma, A., see Armengol, E. 391
Cortes Corberan, V., see Matralis, H.K. 365
De Menorval, L.C., see Fetter, G. 165
Dimitrov, L.D., see Iliev, V.I. 333
Dong, J.-L., see Zheng, J. 141
Fetter, G., Tichit, D., De Menorval, L.C. and Figueras, F.
Synthesis and characterization of pillared clays containing both Si and Al pillars 165
Figueras, F., see Fetter, G. 165
Flego, C., see Kiricsi, I. 401
Fu, Y., Fujimoto, K., Lin, P., Omata, K. and Yu, Y.
Effect of calcination conditions of the oxidized precursor on the structure of a sulfided K–Mo/ γ-Al_2O_3 catalyst for mixed alcohol synthesis 273
Fujimoto, K., see Fu, Y. 273
Fujita, T., see Asami, K. 245
García, H., see Armengol, E. 391
Goncharova, O.V., see Shaikhutdinov, S.K. 125
Goncharova, S.N., Paukshtis, E.A. and Bal'zhinimaev, B.S.
Size effects in ethylene oxidation on silver catalysts. Influence of support and Cs promoter 67
Gonzalez, R.D., see Zou, W. 351
Grzegorczyk, W., see Ryczkowski, J. 341

Yogo, K., see Matsuda, T. 177
Yu, Y., see Fu, Y. 273
Zhang, J., Wang, Y. and Chang, L.
Sulfide catalyst for methanol synthesis, its reactivity and characterization. I. Catalyst preparation and catalytic properties L205
Zhang, J., Wang, Y. and Chang, L.
Sulfide catalyst for methanol synthesis, its reactivity and characterization. II. Reduction properties in relation to catalytic properties L219
Zheng, J., Dong, J.-L., Xu, Q.-H., Liu, Y. and Yan, A.-Z.
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
Zou, W. and Gonzalez, R.D.
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351

ELSEVIER

Applied Catalysis A: General 126 (1995) 413–418

APPLIED CATALYSIS A: GENERAL

Subject Index

Acid faujasites
Acid zeolites as catalysts in organic reactions. Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
Acidity
Synthesis and characterization of pillared clays containing both Si and Al pillars 165
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
Alcohol synthesis
Effect of calcination conditions of the oxidized precursor on the structure of a sulfided K–Mo/ γ-Al_2O_3 catalyst for mixed alcohol synthesis 273
Alkali poisoning
Internal steam reforming in fuel cells and alkali poisoning 381
Alkenyl carbenium ions
Influence of isobutane on the formation of alkenyl carbenium ions from 1-butene over La–beta zeolite 401
Antimony oxide
An initial strategy for the design of improved catalysts for methane partial oxidation 287
Aromatization
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
Auger spectroscopy
Coprecipitated Ni–Al and Ni–Cu–Al catalysts for methane decomposition and carbon deposition I. Genesis of Calcined and reduced catalysts 125
Average Pd particle size
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351
Benzene
Acid zeolites as catalysts in organic reactions. Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
BET surface area and pore size distribution
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Bifunctional catalysts
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
Bimetallic catalysts
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Coprecipitated Ni–Al and Ni–Cu–Al catalysts for methane decomposition and carbon deposition I. Genesis of Calcined and reduced catalysts 125
Butene
Influence of isobutane on the formation of alkenyl carbenium ions from 1-butene over La–beta zeolite 401
C_2 hydrocarbons
Conversion of methane with carbon dioxide into C_2 hydrocarbons over metal oxides 245
Caesium
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
Calcination
Effect of calcination conditions of the oxidized precursor on the structure of a sulfided K–Mo/ γ-Al_2O_3 catalyst for mixed alcohol synthesis 273
Carbon dioxide
Conversion of methane with carbon dioxide into C_2 hydrocarbons over metal oxides 245
Carbon monoxide hydrogenation
Reduction behavior and catalytic properties of cobalt containing ZSM-5 zeolites 51
Carbon tetrachloride
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Catalyst characterization (EDS/SA/TEM/XPS/XRD)
Effect of calcination conditions of the oxidized precursor on the structure of a sulfided K–Mo/ γ-Al_2O_3 catalyst for mixed alcohol synthesis 273
Catalyst characterization (TPO/TPR/XRD)
Characterization of alumina supported nickel–ruthenium systems 257
Catalyst characterization (TPR)
Sulfide catalyst for methanol synthesis, its reactivity and characterization. II. Reduction properties in relation to catalytic properties L219

Catalyst deactivation
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Channel size
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
Charge distribution
Compared formation of light products in n-alkane cracking in Sapo-37 and Si–Al faujasites. Energy gradient selectivity 187
Chemical surface modification
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Chemoselectivity
Acid zeolites as catalysts in organic reactions. Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
Chlorine
Influence of chlorine content on Pt–Re interaction and coke deposition 153
Chromium/magnesia
Catalytic synthesis of 2,6-dimethylphenol form methanol and cyclohexanol over magnesium oxide supported chromium catalysts L229
Chromium (supported)
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Cinnamyl alcohol
Acid zeolites as catalysts in organic reactions. Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
Clays
Catalytic properties of copper-exchanged clays for the dehydrogenation of methanol to methyl formate 177
Cobalt
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
Activity and deactivation of $La_{0.8}Ca_{0.2}Cr_{0.9}X_{0.1}O_3$ (X = Ni, Co) in dry methane using temperature-programmed techniques 319
Cobalt(II)-phthalocyanine complexes
Catalytic oxidation of 2-mercaptoethanol by cobalt(II)-phthalocyanine complexes intercalated in layered double hydroxides 333
Cobalt–ZSM-5
Reduction behavior and catalytic properties of cobalt containing ZSM-5 zeolites 51
Coke deposition
Influence of chlorine content on Pt–Re interaction and coke deposition 153
Copper
Catalytic properties of copper-exchanged clays for the dehydrogenation of methanol to methyl formate 177
Cracking
Compared formation of light products in n-alkane cracking in Sapo-37 and Si–Al faujasites. Energy gradient selectivity 187
Cyclohexene
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Cyclopentane
Influence of chlorine content on Pt–Re interaction and coke deposition 153
Deactivation
Activity and deactivation of $La_{0.8}Ca_{0.2}CrO_3$ in dry methane using temperature-programmed techniques 297
Activity and deactivation of $La_{0.8}Ca_{0.2}Cr_{0.9}X_{0.1}O_3$ (X = Ni, Co) in dry methane using temperature-programmed techniques 319
Dehydrogenation
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Catalytic properties of copper-exchanged clays for the dehydrogenation of methanol to methyl formate 177
Dimethylphenol
Catalytic synthesis of 2,6-dimethylphenol form methanol and cyclohexanol over magnesium oxide supported chromium catalysts L229
Dispersion
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
Ethylene π-complex
Size effects in ethylene oxidation on silver catalysts. Influence of support and Cs promoter 67
Ethylene epoxidation
Size effects in ethylene oxidation on silver catalysts. Influence of support and Cs promoter 67
Extended X-ray absorption fine structure
Coprecipitated Ni–Al and Ni–Cu–Al catalysts for methane decomposition and carbon deposition I. Genesis of Calcined and reduced catalysts 125
Faujasites
Acid zeolites as catalysts in organic reactions. Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
Fischer–Tropsch catalysis
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
Fischer–Tropsch synthesis
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Friedel–Crafts alkylation
Acid zeolites as catalysts in organic reactions.

Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
Fuel cells
Activity and deactivation of $La_{0.8}Ca_{0.2}CrO_3$ in dry methane using temperature-programmed techniques 297
Internal steam reforming in fuel cells and alkali poisoning 381
H_2/n-hexane reaction
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351
Hexane aromatization
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
1-Hexene
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Hydrogenation
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Liquid-phase hydrogenation of saturated and unsaturated nitriles: Activities and selectivities of bimetallic nickel–copper and nickel–iron catalysts supported on silica 115
Hydrogenation in the liquid phase
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Hydrogenolysis
Support modification with organic reagents and its influence on the development of metal active surface areas in Ni/Al_2O_3 catalysts 341
Impregnation (double)
Support modification with organic reagents and its influence on the development of metal active surface areas in Ni/Al_2O_3 catalysts 341
Intercalation
Synthesis and characterization of pillared clays containing both Si and Al pillars 165
Iron
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Isobutane
Influence of isobutane on the formation of alkenyl carbenium ions from 1-butene over La–beta zeolite 401
Isomerization
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
Lanthanum
Influence of isobutane on the formation of alkenyl carbenium ions from 1-butene over La–beta zeolite 401
Lanthanum–calcium–chromium oxide
Activity and deactivation of $La_{0.8}Ca_{0.2}CrO_3$ in dry methane using temperature-programmed techniques 297
Activity and deactivation of $La_{0.8}Ca_{0.2}Cr_{0.9}X_{0.1}O_3$ (X = Ni, Co) in dry methane using temperature-programmed techniques 319
Layered double hydroxides
Catalytic oxidation of 2-mercaptoethanol by cobalt(II)-phthalocyanine complexes intercalated in layered double hydroxides 333
Metal oxide
Conversion of methane with carbon dioxide into C_2 hydrocarbons over metal oxides 245
Methane
Conversion of methane with carbon dioxide into C_2 hydrocarbons over metal oxides 245
Methane oxidation
Activity and deactivation of $La_{0.8}Ca_{0.2}CrO_3$ in dry methane using temperature-programmed techniques 297
Activity and deactivation of $La_{0.8}Ca_{0.2}Cr_{0.9}X_{0.1}O_3$ (X = Ni, Co) in dry methane using temperature-programmed techniques 319
Methane partial oxidation
An initial strategy for the design of improved catalysts for methane partial oxidation 287
Methane reforming
Internal steam reforming in fuel cells and alkali poisoning 381
Methanol
Catalytic properties of copper-exchanged clays for the dehydrogenation of methanol to methyl formate 177
An initial strategy for the design of improved catalysts for methane partial oxidation 287
Methanol synthesis
Sulfide catalyst for methanol synthesis, its reactivity and characterization. I. Catalyst preparation and catalytic properties L205
Sulfide catalyst for methanol synthesis, its reactivity and characterization. II. Reduction properties in relation to catalytic properties L219
Methyl formate
Catalytic properties of copper-exchanged clays for the dehydrogenation of methanol to methyl formate 177
Molten carbonate fuel cell
Internal steam reforming in fuel cells and alkali poisoning 381
Molybdenum
Effect of calcination conditions of the oxidized precursor on the structure of a sulfided K–Mo/ γ-Al_2O_3 catalyst for mixed alcohol synthesis 273

Molybdenum oxide
An initial strategy for the design of improved catalysts for methane partial oxidation 287
Mössbauer spectroscopy
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
n-Butane
Support modification with organic reagents and its influence on the development of metal active surface areas in Ni/Al_2O_3 catalysts 341
Nickel
Activity and deactivation of $La_{0.8}Ca_{0.2}Cr_{0.9}X_{0.1}O_3$ (X = Ni, Co) in dry methane using temperature-programmed techniques 319
Nickel/alumina
Coprecipitated Ni–Al and Ni–Cu–Al catalysts for methane decomposition and carbon deposition I. Genesis of Calcined and reduced catalysts 125
Nickel/alumina catalysts
Support modification with organic reagents and its influence on the development of metal active surface areas in Ni/Al_2O_3 catalysts 341
Nickel–copper/alumina
Coprecipitated Ni–Al and Ni–Cu–Al catalysts for methane decomposition and carbon deposition I. Genesis of Calcined and reduced catalysts 125
Nickel–copper/silica
Liquid-phase hydrogenation of saturated and unsaturated nitriles: Activities and selectivities of bimetallic nickel–copper and nickel–iron catalysts supported on silica 115
Nickel–iron/silica
Liquid-phase hydrogenation of saturated and unsaturated nitriles: Activities and selectivities of bimetallic nickel–copper and nickel–iron catalysts supported on silica 115
Nickel–ruthenium
Characterization of alumina supported nickel–ruthenium systems 257
Nickel (supported)
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Niobium oxide
An initial strategy for the design of improved catalysts for methane partial oxidation 287
Nitriles
Liquid-phase hydrogenation of saturated and unsaturated nitriles: Activities and selectivities of bimetallic nickel–copper and nickel–iron catalysts supported on silica 115
olefins)
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Oxidation
Catalytic oxidation of 2-mercaptoethanol by cobalt(II)-phthalocyanine complexes intercalated in layered double hydroxides 333
Palladium/silica
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Palladium (supported)
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Para-selectivity
Para selective chlorination of toluene with an L-zeolite catalyst 27
Pd β-hydride
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351
Perovskite
Activity and deactivation of $La_{0.8}Ca_{0.2}CrO_3$ in dry methane using temperature-programmed techniques 297
Phthalocyanine tetracarboxylic acid
Catalytic oxidation of 2-mercaptoethanol by cobalt(II)-phthalocyanine complexes intercalated in layered double hydroxides 333
Phthalocyanine tetrasulfonic acid
Catalytic oxidation of 2-mercaptoethanol by cobalt(II)-phthalocyanine complexes intercalated in layered double hydroxides 333
Pillared clays
Synthesis and characterization of pillared clays containing both Si and Al pillars 165
Platinum/silica
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Platinum/zeolites
Comparison between β and L zeolites supported platinum for n-hexane aromatization 141
Platinum–rhenium
Influence of chlorine content on Pt–Re interaction and coke deposition 153
Pore size distribution
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351
Pore structure
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
Potassium–molybdenum/alumina
Effect of calcination conditions of the oxidized precursor on the structure of a sulfided K–Mo/ γ-Al_2O_3 catalyst for mixed alcohol synthesis 273
Promoter effect
Sulfide catalyst for methanol synthesis, its reactivity and characterization. I. Catalyst preparation and catalytic properties L205

Promotor effect
Sulfide catalyst for methanol synthesis, its reactivity and characterization. II. Reduction properties in relation to catalytic properties L219
Pt–Re interaction
Influence of chlorine content on Pt–Re interaction and coke deposition 153
Quinoline
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Reaction conditions
Sulfide catalyst for methanol synthesis, its reactivity and characterization. I. Catalyst preparation and catalytic properties L205
Reduction
Reduction behavior and catalytic properties of cobalt containing ZSM-5 zeolites 51
Reforming catalysts
Influence of chlorine content on Pt–Re interaction and coke deposition 153
Rhodium/silica
Effects of surface modifiers on the liquid-phase hydrogenation of alkenes over silica-supported platinum, palladium and rhodium catalysts I. Quinoline and carbon tetrachloride 39
Sapo-37
Compared formation of light products in n-alkane cracking in Sapo-37 and Si–Al faujasites. Energy gradient selectivity 187
Selectivity (hydrocarbons
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Selectivity (light hydrocarbons)
Compared formation of light products in n-alkane cracking in Sapo-37 and Si–Al faujasites. Energy gradient selectivity 187
Selectivity (methanol)
Sulfide catalyst for methanol synthesis, its reactivity and characterization. I. Catalyst preparation and catalytic properties L205
Silicon content
Compared formation of light products in n-alkane cracking in Sapo-37 and Si–Al faujasites. Energy gradient selectivity 187
Silicon (supported)
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Silver catalyst
Size effects in ethylene oxidation on silver catalysts. Influence of support and Cs promoter 67
Silver particle size distribution
Size effects in ethylene oxidation on silver catalysts. Influence of support and Cs promoter 67
Size effect
Size effects in ethylene oxidation on silver catalysts. Influence of support and Cs promoter 67
Sol–gel processing
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351
Solid oxide fuel cell
Internal steam reforming in fuel cells and alkali poisoning 381
Solid state NMR
Synthesis and characterization of pillared clays containing both Si and Al pillars 165
Steam reforming
Internal steam reforming in fuel cells and alkali poisoning 381
Sulfide catalyst
Sulfide catalyst for methanol synthesis, its reactivity and characterization. I. Catalyst preparation and catalytic properties L205
Sulfide catalyst for methanol synthesis, its reactivity and characterization. II. Reduction properties in relation to catalytic properties L219
Sulphidation
Effect of calcination conditions of the oxidized precursor on the structure of a sulfided K–Mo/ γ-Al_2O_3 catalyst for mixed alcohol synthesis 273
Support effect
Sulfide catalyst for methanol synthesis, its reactivity and characterization. I. Catalyst preparation and catalytic properties L205
Sulfide catalyst for methanol synthesis, its reactivity and characterization. II. Reduction properties in relation to catalytic properties L219
Surface diffusion
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351
Surface modification
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Tantalum oxide
An initial strategy for the design of improved catalysts for methane partial oxidation 287
Temperature-programmed reduction
Reduction behavior and catalytic properties of cobalt containing ZSM-5 zeolites 51
Sulfide catalyst for methanol synthesis, its reactivity and characterization. II. Reduction properties in relation to catalytic properties L219
Selective oxidation of toluene over V_2O_5/TiO_2 catalysts. Effect of vanadium loading and of

molybdenum addition on the catalytic properties 365
Temperature-programmed techniques
Characterization of alumina supported nickel–ruthenium systems 257
Activity and deactivation of $La_{0.8}Ca_{0.2}CrO_3$ in dry methane using temperature-programmed techniques 297
Activity and deactivation of $La_{0.8}Ca_{0.2}Cr_{0.9}X_{0.1}O_3$ (X = Ni, Co) in dry methane using temperature-programmed techniques 319
Thermal stability
Synthesis and characterization of pillared clays containing both Si and Al pillars 165
Thermal stability and sintering
Thermal stability of silica supported palladium catalysts prepared by the sol–gel method 351
Thiol
Catalytic oxidation of 2-mercaptoethanol by cobalt(II)-phthalocyanine complexes intercalated in layered double hydroxides 333
Tin (supported)
Surface modified bimetallic catalysts: preparation, characterization, and applications 1
Toluene chlorination
Para selective chlorination of toluene with an L-zeolite catalyst 27
Toluene selective oxidation
Selective oxidation of toluene over V_2O_5/TiO_2 catalysts. Effect of vanadium loading and of molybdenum addition on the catalytic properties 365
Tungsten oxide
An initial strategy for the design of improved catalysts for methane partial oxidation 287
Vanadia–molybdena on titania catalysts
Selective oxidation of toluene over V_2O_5/TiO_2 catalysts. Effect of vanadium loading and of molybdenum addition on the catalytic properties 365
Vanadia on titania catalysts
Selective oxidation of toluene over V_2O_5/TiO_2 catalysts. Effect of vanadium loading and of molybdenum addition on the catalytic properties 365
X-ray diffraction
Reduction behavior and catalytic properties of cobalt containing ZSM-5 zeolites 51
Pretreatment effect studies with a precipitated iron Fischer–Tropsch catalyst 85
Characterization of alumina supported nickel–ruthenium systems 257
X-ray photoelectron spectroscopy
Selective oxidation of toluene over V_2O_5/TiO_2 catalysts. Effect of vanadium loading and of molybdenum addition on the catalytic properties 365
Zeolites
Para selective chlorination of toluene with an L-zeolite catalyst 27
Reduction behavior and catalytic properties of cobalt containing ZSM-5 zeolites 51
Compared formation of light products in n-alkane cracking in Sapo-37 and Si–Al faujasites. Energy gradient selectivity 187
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
Acid zeolites as catalysts in organic reactions. Chemoselective Friedel–Crafts alkylation of benzene and toluene with cinnamyl alcohol 391
Influence of isobutane on the formation of alkenyl carbenium ions from 1-butene over La–beta zeolite 401
ZSM-11
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
ZSM-12
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
ZSM-34
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
ZSM-5
Investigation of bifunctional zeolite supported cobalt Fischer–Tropsch catalysts 235
